

HERA ARMS

HIGHGRADE EUROPEAN RESEARCH FOR SMALL ARMS

Grip, HERA HFG

Ref. 18176 - Black

Ref. 18177 - Tan

Ref. 18178 - OD Green

HERA Front grip (HFG) is an easy to install vertical front grip made out of fiberglass reinforced polymer. It is short and compact with a slim snag free profile. The exterior has a modern design with textured grip surfaces. There is an internal storage compartment that can be used to store a small tool kit.

Features:

- Durable Polymer
- Fully licensed by HERA Arms
- Compartment for storage
- Made in Germany

TAC6

TAC 6, 6mm Airsoft rifle

Ref. 18105

Bipod
and sights
included

News
Ultimo March

- Ergonomic grip with finger grooves for shooter comfort
- Full length metal top rail for optics and accessories
- Bottom rail for attachment of bipod, lights, or lasers
- Rubberized buttstock pad for comfort when shouldering the rifle
- Non-blowback design for increased CO₂ efficiency

The TAC rifle is a light weight, CO₂ powered rifle with an ergonomic pistol grip that holds the BB's in a stick type magazine allowing a fast reload.

The rifles feature a full-length picatinny styled top rail for optics and accessories.

The lower part of the rifle has a long rail for attaching the included fully adjustable folding bipod, and can be used for other equipment like tactical lights.

Furthermore the rifle features an integrated mounting bay for a laser aiming module especially designed for this rifle. The thumbhole stock has a built in rubber pad for added comfort when shouldering the rifle. Included is also a pair of removable fixed sights with an illuminated fiber optic front bead.

Using CO₂ means more power and a high fire rate, making this an exciting and fun gun to shoot.

Dan Wesson 2,5" Silver Pellet Airgun

Dan Wesson, 2,5" Pellet Airgun
Ref. 18101

Dan Wesson
DAN WESSON FIREARMS®

Pellet airgun with rifled inner barrel.

This 2.5" silver plated revolver licensed by Dan Wesson, offers realistic shooting fun in a handy size. It is one of a new generation of Dan Wesson airguns with a rifled inner barrel allowing the use of pellets; this improves both range and precision. It has authentic markings and an individual serial number stamped into the frame. The revolver features a double action trigger system and adjustable rear sight for extra realism and accuracy. The Dan Wesson revolver is made of metal except for the ergonomic grip constructed in hard ABS plastic. The 12g CO₂ cartridge is stored in the grip and is easily accessed by sliding the grip back – easy-load style. Each of the 6 cartridges holds one 4.5mm pellet and is placed in the metal cylinder that rotates as each round is fired. The revolver comes with speed-loader, attachable rail for optics and 6 heavy-duty all metal cartridges.

Dan Wesson 2,5" - silver AIRGUN

Ref. 17177

The biggest and most powerful revolver in the Dan Wesson family is the monstrous 8" version. The 90's SNAP megahit "I've got the power" is added whole new meaning when sporting this huge 8" revolver. Impressive weight, more than 1 kilo, and a power output of more than 150 m/s (500 fps), this revolver really is a force to be reckoned with. Included: Speed loader, changeable tactical rail and 6 shells.

SP-01 SHADOW AIRGUN

Ref. 17526

The CZ SP-01 SHADOW is an exciting new CO2 powered airgun based on the latest generation of pistols from CZ, designed from input provided by Law Enforcement, Military and Police communities worldwide, and with additional input from the world premier shooters of Team CZ.

This non-blowback pistol is lightweight and easy to operate, the ergonomic grip with checkered rubber grip panels make it sit extremely well in the hand. It features a fiber optic front sight and an accessory rail. A barrel extension tube can easily be threaded on by removing the front caps. (See ref. 15924 and 15925)

CZ

BERSA THUNDER 9 PRO AIRGUN

Ref. 17302

Originally developed by BERSA, as a military/law-enforcement sidearm, the Thunder® Pro HC was built to perform under adverse conditions and provide decisive stopping power. This is a semi-automatic 4.5 mm (.177) airgun version fully licensed by BERSA. It is powered by a 12g CO2 cartridge stored in the grip using the easy-load system and the BB's are put in a removable stick magazine. The Thunder® Pro HC is a lightweight, full-sized handgun, with a ergonomic design. An integrated picatinny rail allows for mounting of lasers or tactical lights. The grip and slide carries authentic BERSA markings and every gun comes with unique serial number.

ULTRAIR®

CO₂ lubrication cartridges, ULTRAIR, 5 pcs.

Ref. 17425

Make cleaning and maintaining your CO₂ gun a breeze. The new lubrication capsules from ASG can be used in all CO₂ powered Airguns and Airsoftguns that are using a 12 g CO₂ capsule. In addition to the CO₂ gas, the capsules are also filled with 0.8 g of silicon oil that cleans and lubricates the valve while shooting, and at the same time provides all moving parts of the gun with a layer of oil that lowers friction and wear, resulting in smooth action, consistent accuracy and increased lifespan of all parts.

ULTRAIR®

ULTRAIR 12 gr. CO₂ cartridge, 5 pcs

Ref. 15545

Each Cartridges contains 12 g of CO₂, used to power airsoft guns and airguns.
Box of 5 pcs.

ULTRAIR®

ULTRAIR 12 gr. CO₂ cartridges, 500 pcs

Ref. 16117

Each Cartridges contains 12 g of CO₂, used to power airsoft guns and airguns.
Box of 500 pcs.

Low weight & size, high output. Delivered in quality box.

Battery, 7,4V 1000 mAh, LI-PO
Ref. 17462

Great selection
of high quality
batteries

Battery, 11,1V 1500 mAh, LI-PO, single stick type
Ref. 18156

A compact 11.1V Li-Po battery with its 3-cell in one block construction, allows this battery to fit inside. Despite its small size it still packs 1500mAh. It comes in a handy storage box.

The biggest reasons to use a Li-Po is its smaller size and better power efficiency. Most Li-Po batteries are about the same size as a mini-type battery and is equal in power to a large type NiMH battery. No need for battery slings, battery boxes, or big batteries strapped on to guns. Li-Po is a power source for small carbines, PDW's, SMG's, etc. that doesn't require you to spoil the look of the gun, or run the risk of running out of power in the middle of a battle.

Auto-stop charger LiPo, LiFe

Auto-stop charger, LiPo LiFe, EU-version.
Ref. 17942

Auto-stop charger, LiPo LiFe, UK-version
Ref. 17943

Get the most out of your batteries with this easy-to-use balance charger. It charges Li-Po and Li-Fe Airsoft batteries with a simple plug-and-charge design. The charging current can be adjusted to fit almost any battery capacity allowing a fast charge. During the charging process, the battery cells will be balanced automatically, which will ensure optimal life span of your battery. This feature is usually only found on chargers in a much higher price range. A standard charge leads socket allows you to use your own charge leads. Available in EU and UK versions with appropriate electrical plugs

Features:

- Fast charging (up to 3A)
- Prolongs the battery life span
- Great value for the money
- Charges Li-Po and Li-Fe batteries
- Handles 2, 3, and 4 cells batteries
- Adjustable charging current (1,2 or 3A)
- Auto balancing of the cells
- Charge status led
- Simple plug-and-charge use

CZ EVO 3A1 SCORPION®

Scorpion EVO 3 - A1 Adaptor, 18mm to 14mm ccw

Ref. 17950

For mounting standard 14mm CCW accessories, such as barrel extension, flash hiders and other similar accessories. This adaptor replaces the 18mm flash hider and allows any Airsoft barrel attachment to be screwed on the 14mm CCW threading.

Spring, Scorpion EVO 3 - A1, Standard

Ref. 18179: M120

Ref. 18180: M95

Steel Spring Guide w/Bearing, Scorpion EVO 3 - A1

Ref. 18163

Upgraded spring guide for the EVO 3A1.

This upgraded spring guide has a core of high-tension steel, making it capable of handling any power spring one could wish to install in the EVO. The outer part of the guide rod has a free rotating sleeve made in POM polymer, which protects the spring from unnecessary wear and heat build-up, as well as minimizing friction. In combination a supported pressure bearing this spring guide will handle any power level of springs installed and ensure maximum spring lifespan. It is also the easiest upgrade ever, since the spring guide on the EVO can be removed without disassembly.

Features:

- Prolongs the spring lifespan
- Extremely strong- handles from M90 to M190 springs and above
- Increases the ROF (Rate of Fire)
- Increases muzzle velocity
- Reduces mechanical friction
- Reduces power usage

Steel Spring Guide w/Bearing
